FLAMING JUNE BY FREDRICK LEIGHTON 1895

According to Leighton, the composition was inspired by the posture of a tired model. He elaborated her sinuous pose and then added sheer orange draperies. Her skin flushed by the Sun, she is transformed into a personification of summer heat.

Gemini is the star sign born between May 22 and June 22, and belong to the Air element of the zodiac (along with Libra and Aquarius). Their main Gemini traits are being super-fast, super-smart, super-adaptable and super-curious people. Geminis are flexible, extroverted, and clever, and there's never a boring moment while they're around. Their flaws include indecisiveness, impulsivity, unreliability, and nosiness, therefore don't disclose a Gemini your innermost deepest fears

Cancer is the first constellation in summer and people born between June 22 and July 22 are under this astrological sign. Cancer is situated to the east of Gemini and to the west of Leo and it is symbolized through the Crab. Cancerians are sincere, faithful, kind-hearted, righteous and indomitable people. Also, they are emotional, sensitive, and suspicious and often feel insecure; they are hard to please and prone to hysteria. Male Cancerians are quite good men and attached to family; female Cancerians are very caring and maternal.
